# Cedric **Maume**

Computational Engineer (B.Sc.)

### About Me

I am a highly motivated engineering student with experience in robotics, aerospace and software engineering

### Personal Info

**Nationality:** German
**Born:** 2000

### Languages

| | |
|---|---|
| **German** | C2 (Native) |
| **English** | C2 (Native) |

### Skills

Git • Docker • Linux • CAD
3D Printing • Godot • ROS
Unity • Proxmox • LaTeX
Embedded Systems • AR
Computer Networking

### Programming

| | |
|---|---|
| **C++** | ● ● ● ○ |
| **Python** | ● ● ● ○ |
| **GDScript** | ● ● ● ○ |
| **Javascript** | ● ● ○ ○ |
| **C#** | ● ● ○ ○ |

## Education

04/2026 - Current
**RWTH Aachen University**
Computational Engineering Science (M.Sc)

10/2018 - 02/2026
**RWTH Aachen University**
Computational Engineering Science (B.Sc)

2013 - 2018
**[redacted] Secondary School**
[redacted], Canada

2012 - 2013
**[redacted] Schule**
[redacted], Germany

2009 - 2012
**[redacted] Elementary**
[redacted], USA

2006 - 2009
**Grundschule [redacted]**
[redacted], Germany

## Experience

11/2023 - 03/2026
**Working Student**
Institute of Mechanism Theory, Machine Dynamics and Robotics

Development and Integration of software solutions for several robots in ROS2 (Robot Operating System) using Python and C++.

- **Software Development:** Designing of a hardware interface for robotic control, Inverse Kinematics of multi-joint robots, etc.
- **Robot Control Research Paper:** Researching the impact that a software environment has on latency and determinism for Ethernet-based communication protocols (Modbus, OPC-UA, TCP, UDP).

04/2025 - 01/2026
**Internship • Working Student • Bachelor Thesis**
Siemens AG

Software Development within an R&D Department focusing on Advanced Manufacturing and Circularity:

- **Internship:** Development of a web application for dynamically recognizing and fixing part defects
- **Working Student:** Building software to automatically extract information and classify a variety of NC Code files
- **Bachelor Thesis:** Development of a complete Augmented Reality system designed to assist workers within manufacturing. Deployed on a pair of lightweight AR Glasses

01/2024 - 12/2024
**Mobile Software Developer**
Factor36 (Self-Published)

Independently designed and coded an arithmetic-based puzzle game from scratch within Godot, published on the Google Play Store

06/2023 - 09/2023
**Project Research Paper**
Laboratory for Machine Tools and Production Engineering (WZL)

Translated an existing digital twin of a 6-axis robotic arm in Python/C++ using the Bullet Physics Engine
